

 Within the implementation of the international project DRINKADRIA ("Networking for Drinking Water Supply in the Adriatic region"), in Nikšić at 26 February 2016, held final national workshop dedicated to NRW.

The workshop was organized by the PE "Water and Sewerage" Nikšić, which is participating in the project DRINKADRIA as one of 17 partners from 8 countries of the Adriatic region.

The aim of these workshops is to present activities and achieved results of ViK-a Nikšić in minimizing losses on the water supply network, and exchange knowledge and experiences with representatives of relevant partners in this area.

The presentation entitled "Reducing non-revenue water (NRW) within the project: Consulting services for institutional support to ViK Ulcinj" was given by Mr. Dzevad Koldzo, who was engaged as a technical expert of consulting company Sachsen Wasser (Leipzig, Germany) on the ViK Ulcinj capacity development project, which is being implemented by Vodacom.
