Ambassador Republic of Germany in Montenegro His Excellency Mr. Pius Fischer, accompanied by the Mayor of Ulcinj Mr. Nazif Cunda visited the IHGF team which is implementing the sound leak detection project in Ulcinj currently. Chief engineer on the project, Mr. Djevad Koldzo informed ambassador and city mayor about the current situation on the field and presented applied methodology.

Ambassador Fischer was particularly interested for method which our teams use for detection underground leaks.

Engineer Marko Ristanovic Vodacom - Tivat) presented the project objectives and planed future activities. The project "Consulting Services for Support to Vodacom in the Preparation of a Feasibility Study - Water Supply and Sanitation Adriatic Coast, Phase V, Ulcinj" is financed by the KfW bank through Vodacom Company (Joint Service and Coordination Company for Water and Waste Water Services for the Montenegrin Coast). Project is performing Dahlem GmbH company from Essen (Germany).
