

Results of the project: Leakage Reduction Studies for Five Municipalities of Plava Voda Regional Water Supply Project (EU funded Infrastructure Projects Facility in the Western Balkans (IPF-1) - Part of WBIF) were presented on the special sessions of the Municipal Councils in Vitez and Travnik (Bosnia and Herzegovina) on Monday, (02. December, 2013.)

The project was implemented by: WYG International and IHGF Sarajevo. In addition to these two municipalities project was implemented in the municipalities of Novi Travnik, Zenica and Busovaca.

In the framework of the project, which was completed late last year in each municipality was conducted:

- Review of existing situation in distribution network,
- Proposed the strategy for developing of the Cadastre of underground installations,
- Determined water balance for the distribution network (Using "Bottom - Up approach),
- Identified and prioritised DMAs,
- Carried out sound leakage detections studies in one selected DMA in each municipality,
